

40 WAY SPEAKER SELECTOR & MONITOR PANEL ATC 5140

Model ATC 5140 40 position speaker selector panel with all call and monitor speaker. Manufactured in Australia by Techcraft Sound Systems Pty. Limited.

The ATC 5140 is equipped with forty high quality DPDT push on/push off selector switches, printed circuit board mounted and connected to screw terminals mounted on the edge of the P.C. board.

An all call switch is also supplied and wired to enable all call connection to all speaker positions regardless of their status. The all call switch has a red mechanical bezel to indicate the on position. The monitor speaker mounted on the panel is supplied with tapped 100v line transformer, which is connected to a volume attenuator on the panel.

A decal panel is mounted in the centre of main panel enabling a cardboard trip to be inserted for identification of the switch positions.

Panel dimensions 76 H × 482 W × 5 D cms.
